SANAN SHAIKH

Sawantwadi, Maharashtra 416510, India • Open to Relocate • +91 7021956965 • shaikhsanan.04@gmail.com • linkedin.com/in/shaikhsanan04

PROFESSIONAL SUMMARY

Aspiring Data Scientist with a solid programming background spanning web development and IT support, now focused on building and deploying data-driven solutions using Python, SQL, and Machine Learning. Skilled in exploratory data analysis (EDA), predictive modeling with Scikit-learn, SQL data cleaning, and building interactive ML web apps using Streamlit. Deployed 3 live ML applications on Streamlit Cloud. Actively seeking entry-level Data Scientist, Data Analyst, or Machine Learning Engineer roles to apply analytical thinking and contribute to data-driven teams.

TECHNICAL SKILLS

Languages & Libraries: Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Requests, BeautifulSoup

Machine Learning: Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Scikit-learn Pipelines

Data Science: Exploratory Data Analysis (EDA), Data Cleaning, Statistical Analysis, Predictive Modeling, Data Visualization

Databases & Deployment: MySQL, MySQL Workbench, SQL Data Cleaning, Streamlit, Streamlit Cloud

Business Intelligence: Power BI

Cloud Platforms: GCP (BigQuery, Cloud Storage), AWS (S3), Azure (Blob Storage)

Environment & Tools: Jupyter Notebook, Google Colab, Git, GitHub, VS Code

WORK EXPERIENCE

Web Developer | The Luxury Real Estate | Dubai, UAE (Remote)

June 2024 – July 2025

- Analyzed website traffic and user behavior data across 10,000+ monthly sessions using Google Analytics to identify engagement trends, contributing to a 35% increase in lead conversions.
- Implemented structured data (schema markup), meta optimization, and performance tracking in collaboration with 3-person marketing and SEO team.
- Reduced page load times by 40% using GTmetrix and Google PageSpeed Insights, improving mobile usability scores by 25+ points.
- Conducted plugin audits and uptime monitoring across 5+ active sites, leveraging performance data to maintain 99.9% uptime and improve site reliability.
- Applied data-driven analytics insights to refine mobile layouts, improving average session duration by 15%.

React Developer & Web Designer | Adal Agency | Maharashtra, India

July 2023 – February 2024

- Built 8+ responsive React-based web applications with performance optimization and user interaction tracking, improving load performance by 30%.
- Translated Figma designs into structured UI components for 5+ client projects while maintaining accessibility and usability best practices.
- Applied mobile-first design principles to achieve consistent responsiveness across 3 major device breakpoints.
- Incorporated stakeholder feedback through 2-week iteration cycles based on usability and engagement metrics.

Desktop Support Engineer | Dynacons Systems & Solutions Ltd. | North Goa, India

July 2022 – May 2023

- Supported cloud server environments for 50+ users by diagnosing and resolving system performance and configuration issues with an average resolution time under 2 hours.
- Monitored server health dashboards daily and responded to 100+ performance-related queries from developers across the project lifecycle.
- Contributed to server configuration and system stability for Goa Electronics Limited, supporting uninterrupted operations for 200+ end users.
- Reduced recurring technical bottlenecks by 20% through systematic troubleshooting and root-cause analysis documentation.

PROJECTS

Mall Customer Segmentation | Python, Scikit-learn, KMeans, Streamlit | GitHub ↗

- Applied KMeans and Hierarchical Clustering on 200-customer Kaggle dataset to segment by income and spending score into 5 actionable business groups.
- Used Elbow Method and Silhouette Score (0.5547) to independently validate optimal K=5; visualized clusters with color-coded scatter plots and centroids.
- Deployed as an interactive Streamlit web app allowing users to explore segments, adjust cluster count, and view business recommendations in real time.

Customer Churn Prediction | Python, Scikit-learn, Pandas, Streamlit | GitHub ↗

- Built and compared 3+ classification models (Logistic Regression, Decision Tree, Random Forest) to predict telecom customer churn, enabling proactive retention strategies.
- Delivered end-to-end pipeline — data cleaning, EDA, feature selection, model training — evaluated using Accuracy, Precision, Recall, and ROC-AUC across all models.
- Deployed as a live Streamlit app where users input customer attributes and receive real-time churn probability predictions with model explanation.

Ecommerce Sales Forecasting | Python, Scikit-learn, Pandas, Streamlit | GitHub ↗

- Developed and benchmarked 4 regression models to forecast ecommerce revenue; engineered 3 time-based features (year, month, day of week) to capture seasonal sales patterns.
- Linear Regression achieved best performance; evaluated all models using MAE, RMSE, and R^2 score — deployed as interactive Streamlit app with live revenue predictions.

Walmart Sales Exploratory Data Analysis (EDA) | Python, Pandas, NumPy, Matplotlib, Seaborn | GitHub ↗

- Performed EDA on Walmart sales dataset covering 45 stores and 3 years of weekly transaction data to uncover seasonal trends, holiday impacts, and sales distribution patterns.
- Produced 10+ visualizations communicating key business insights including peak sales periods and store-level performance variance to non-technical stakeholders.

Crime Data Cleaning — SQL | MySQL, MySQL Workbench | GitHub ↗

- Performed large-scale SQL data cleaning on a real-world crime dataset using MySQL Workbench — handling nulls, duplicates, inconsistent formatting, and structural issues.
- Applied advanced SQL techniques including CASE statements, string functions, date formatting, and multi-step transformations to produce analysis-ready data.

EDUCATION

Bachelor of Science, Information Technology
SPKM College, Sawantwadi | University of Mumbai
July 2018 – June 2021

CERTIFICATIONS

- Data Science Certification
- Python for Machine Learning
- Front End Development
- AI Tools & ChatGPT Workshop
